

Layers of the Rainforest

An illustration of the emergent layer of a rainforest. It shows a yellow monkey sitting on a thick branch on the left. In the center, a blue butterfly is perched on a tree branch. On the right, a colorful parrot with blue, red, and yellow wings is flying. The background consists of tall, thin trees with sparse foliage.

emergent

An illustration of the canopy layer of a rainforest. It shows a dense layer of green trees. On the left, a toucan with a large orange beak is perched on a branch. In the center, a green frog with red eyes is sitting on a branch. On the right, a sloth is hanging from a branch. The background is filled with more green foliage.

canopy

An illustration of the understory layer of a rainforest. It shows a green and yellow striped snake coiled on a branch in the center. On the right, a line of red ants is crawling up a tree trunk. The background is filled with more green foliage and tree trunks.

understory

An illustration of the forest floor of a rainforest. It shows a leopard with orange and black spots on the left. In the center, a tapir is walking. On the right, a beetle is on the ground. The background is filled with green plants and tree trunks.
