Test 2

٢

 A snail lives in its shell. It carries its shell on its back. A snail has no legs. It slides along slowly on a slimy foot, leaving a trail of slime behind. Snails like to hide in dark damp places. They like it best when it rained and everything is wet. They come out to eat at night they eat small, new plants, as these are soft and fresh. If a snail senses danger, it hides inside its shell. Its eyes are on the end of stalks, so it can poke one eye out to see if the danger has passed without showing most of its body. 1 In line 3, write the missing punctuation in the gap. 1 In line 5, add a full stop and a capital letter. 3 In line 5, circle all the nouns. 4 Write a connective (a joining word) from line 8:
