

**Concept: Statistics**

Skill: I can interpret and present data using bar charts, tables and pictograms.

SMALL STEP: Bar Charts (PS) - PURPLE

1. The bar chart shows favourite stories.

Fewer children like action than wizards,  
but more like action than comedy.

Complete the bar chart to show how many  
children could like wizards and action.

Can you think of two more possibilities and draw the pictograms to show them?

**Concept: Statistics**

Skill: I can interpret and present data using bar charts, tables and pictograms.

SMALL STEP: Bar Charts (PS) - PURPLE

**2. A class collects data about goals.**

Team A		 = 2 goals  = 4 goals
Team B		
Team C		
Team D		

Team B scored 5 fewer goals than Team C.

Team C scored 10 more goals than Team D.

**Draw a bar chart to display this information. Choose a suitable scale.**

Draw your bar chart below, but take care as you may need to do something else first...
